- ✓ Practical, confidence-building workshops for adults (minimum age 19)
- ✓ Sessions can be tailored to needs and delivered where you are, in our centres or **ONLINE**

Help Your Child with Maths

For parents & carers of primary school children

We work with schools and family hubs to offer short courses for parents and carers to help them to support their children with maths.

Led by ex-school teachers, these sessions show participants how to explore different ways of doing maths, building their confidence to help their children with learning using engaging games and activities.

"Being able to join this course has been great because it has refreshed my maths, explaining it in ways that I have found a lot simpler, and the games we use to practise maths together are really fun."

Support Maths Learning with Confidence

For Primary Teaching Assistants

We offer a 1-day, confidence-boosting CPD course for primary school teaching assistants in maths.

The session explores maths resources and activities and builds on scaffolding and growth mind-set techniques as well as looking at how to identify maths anxiety in children and support their learning.

Skills & Learning also offer general numeracy and maths courses for all adults including Functional Skills qualifications from Entry Level to Level 2.
